

Contents

<i>Abdullayev F. G.</i> On The Convergence Of Bieberbach Polynomials In Regions With Zero Angles	1
<i>Abdullayev F. G., Kaya E.</i> On the Additive Arithmetical Semigroups ...	3
<i>Abdullayev F. G., Özkartepe P.</i> p -Bieberbach Polynomials And Their Approximation Properties	4
<i>Abolghasemi M.</i> Perturbation Of Frames In Hilbert C^* -Modules	6
<i>Averbuch A. Z., Bermanis A., Coifman R. R.</i> Multiscale Data Sampling And Function Extension	6
<i>Averbuch A. Z., Neittaanmäki P., Pölönen I., Zheludev V. A.</i> Cancerous Skin Diagnostics By Hyperspectral Imaging	7
<i>Averbuch A. Z., Zheludev M. V.</i> Target Recognition In Hyper-Spectral Images	9
<i>Bakić D.</i> Scaling Sets And Orthonormal Wavelets With Dilations Induced By Expanding Matrices ...	11
<i>Balázs K., Kilgore T.</i>	

On Derivatives Of Trigonometric And Algebraic Polynomials	12
<i>Behera B., Jahan Q.</i>	
Multiresolution Analysis On Local Fields And Characterization Of Scaling Functions	12
<i>Burova I. G.</i>	
On I-Splines Construction	13
<i>Bushuev O. Yu.</i>	
A Pressure Transducer Signal Analysis By Prony's Method	15
<i>Castro D. A., Gomes S. M., Stolfi J.</i>	
Adaptive Finite Volume Method Based On Multiresolution Analyses For Dyadic Grids ..	17
<i>Chernykh N. I., Subbotin Yu. N., Vereschagin V. P.</i>	
Meyer's Wavelets In Some Problem Of Mechanics	19
<i>Corbacho E.</i>	
The RAFU Method On Approximation	20
<i>Dem'yanovich Yu. K.</i>	
Embedded General Spline Spaces Of The First Order	23
<i>Dinh Z., Ullrich T.</i>	
Kolmogorov n-Widths For High-Dimensional Sparse Approximations	25
<i>Dubosarskij G. A.</i>	

Harmonic Wavelets In Multiply Connected Domain With Circular Boundaries	25
<i>Dvorkovich V. P., Gryzov G. Yu., Tchobanou M. K.</i>	
Design Of Filter Banks For m -Channel Multi-rate Systems ($m > 2$)	27
<i>Dyn N.</i>	
Net Subdivision Schemes: Analysis And Examples	28
<i>Erina E. A.</i>	
Approximation Of Continuous Functions by Haar Polynomials With Arbitrary Dilation Factor	29
<i>Evdokimov S. A.</i>	
Haar Multiresolution Analysis And Haar Bases On The Ring Of Rational Adeles	30
<i>Farkov Yu. A.</i>	
On Wavelets In Walsh Analysis	32
<i>Fattahi A.</i>	
On Stability Of Continuous Fusion Frame ...	34
<i>Fedorov E. A., Kovalev S. N., Rozhenko A. I., Shaidorov T. S.</i>	
On Fitting Inaccurate Data With Splines, II	35
<i>Filippov V. I.</i>	
About A. N. Kolmogorov Theorems On Fourier Series And Conjugate Functions	37

<i>Goncharov A. A., Torgashov A. Yu.</i> An Application Of Wavelets For Predictive Models Identification Of The Plants With Variable Sample Rate Of Outputs	38
<i>Grohs P.</i> On The Structure Of Anisotropic Frames....	40
<i>Guryanov A. M., Lebedev V. M., Lebedev V. T.</i> Wavelet Analysis Of A Small-Angle Neutron Scattering Data	41
<i>Gómez-Cubillo F. M., Suchanecki Z., Villullas S.</i> Spectral Formulas And Algorithms For Or- thonormal Wavelets	43
<i>Han B.</i> Framelets and Wavelets in the Discrete Set- ting	44
<i>Hur Y., Zheng F.</i> Coset Sum: An Alternative To The Ten- sor Product To Construct Multidimensional Wavelets	45
<i>Ibryaeva O. L.</i> On Pade Approximant Computing In Pade- Laplace Method	45
<i>Jetter K.</i> Non-Negative Scalar Subdivision And Beyond	47
<i>Kempka H.</i> Wavelet Bases In Several Function Spaces ...	48

<i>Khalidov I., Unser M., Ward J. P.</i> Operator-Like Wavelet Bases Of $L_2(\mathbb{R}^d)$	49
<i>Kiseliov R. V., Lavrova A. I., Plyusnina T. Yu., Postnikov E. B.</i> Wavelet Bifurcation Analysis Of Dynamical Systems: A Case Study In Oscillations Of Plant'S Transmembrane Potential	50
<i>Klionskiy D. M., Oreshko N. I.</i> Harmonic Wavelet Transform In The Analysis Of Oscillating Signals	51
<i>Kosogorov O. M., Makarov A. A.</i> Some Results Of Comparison Of Wavelet Com- pression Algorithm	53
<i>Kreit D., Nicolay S.</i> Some Characterizations Of Generalized Hölder Spaces	54
<i>Krishtal I.</i> Dynamical Sampling: Time-Space Trade-off .	56
<i>Krivoshein A. V.</i> Symmetric MRA-Based Wavelets	56
<i>Leviatan D., Lubinsky D.</i> The Degree Of Shape Preserving Weighted Polynomial Approximation	57
<i>Lebedeva E. A.</i> Localized Periodic Wavelets	58
<i>Li B. B., Li D. F.</i>	

Balanced Multiwavelets With Optimum Time-Frequency Resolution	59
<i>Li Y.-Z., Zhou F.-Y.</i>	
Rational Time-Frequency Super Gabor Frames And Their Duals	60
<i>Lukomskii S. F.</i>	
Wavelet Riesz Bases With Noncompact Support On Zero-Dimensional Group	60
<i>Rashidi-Kouchi M., Nazari A.</i>	
Dual Of g-Riesz Bases In Hilbert C*-Modules	62
<i>Nekrasov V.</i>	
Empirical Analysis Of Financial Time Series For Piecewise Homoscedasticity By Means Of Wavelet MSML Algorithm	64
<i>Nitzan S., Olevskii A.</i>	
On Landau's Density Theorems	65
<i>Pap M.</i>	
Hyperbolic Wavelets And Multiresolution In The Hardy Space Of The Unit Disc And Upper Half Plane	65
<i>Perel M. V.</i>	
Decompositions Of Solutions Of The Wave Equation Based On Wavelets	66
<i>Pitolli F.</i>	
Wavelets With General Dilation	68
<i>Platonov S. S.</i>	

Fourier-Jacobi Harmonic Analysis And Approximation Of Functions	69
<i>Portal A., Pérez-Villalón G.</i>	
Interpolation Of Local Average Data With Cardinal Splines	71
<i>Postnikov E. B.</i>	
Wavelet Transform Based On PDE Solutions: From 1D Signals To Image Processing	73
<i>Postnikov E. B., Singh V. K.</i>	
Numerical Wavelets Method For System Of Singular Volterra Integro-Differential Equation	75
<i>Prestin J.</i>	
Multivariate Periodic Multiresolution	75
<i>Prisheltsev M. Yu.</i>	
Complex-Valued Biorthogonal Filters For JPEG2000 Algorithm	76
<i>Protasov V. Yu.</i>	
Application Of Subdivision Schemes In Number Theory	78
<i>Radzievska E. I.</i>	
On Estimates Of Singular Numbers Of A Hilbert-Schmidt Integral Operator	80
<i>Redko I. V.</i>	
On Fourier-Daubechies(D4) Coefficients	82
<i>Ryabtsov I. S.</i>	
Prime Frame Criterion	84

<i>Sahoo J. K.</i> Inverse Problems And Regularization In Learning Theory	86
<i>Saliani S.</i> Parseval Frames Built Up From Generalized Shift Invariant Systems	87
<i>Severov P. G.</i> On Radii Of Alpert Multiwavelets.....	88
<i>Shadrin A.</i> Markov Inequality For Splines	89
<i>Sheikh N. A.</i> Convergence Of Wavelet Expansions	90
<i>Shukla N. K., Yadav G. C. S.</i> Contractibility Of Families Of Scaling Sets Having Finite Components.....	91
<i>Strelkov N. A.</i> Average Dimension And Widths.....	92
<i>Temlyakov V.</i> Quasi-Greedy Bases And Lebesgue-Type In- equalities	95
<i>Terekhin P. A.</i> The Best L_p -Approximation Of Functions By Polynomials In An Affine System	95
<i>Voynov A. S.</i> Multidimensional Self-Similarity Equations .	97

<i>Zadorin A. I.</i>	
Interpolation Formula For Functions With A Boundary Layer Component And Its Applica- tions	99
<i>Zakharov V. G.</i>	
Compactly Supported Analogs Of The Poly- harmonic B-Splines	101
<i>Zakharova A. A.</i>	
Smoothness And Stability Of Nonlinear Mul- tiscale Representations	103
<i>Zhuk V. V.</i>	
Simple Proofs Of Jackson-Type Theorems...	105
<i>Zvyagin A. V.</i>	
Optimal Feedback Control In The One Math- ematical Model Of Fluid Motion	105
Index	108
List of Participants of WLA 2012	111
