

## List of talks

<b>Valeriy. A. Abdulkadyrov</b> , Galina N. Gestrina	
Electromagnetic wave diffraction on the set of periodic shields located above the shielded magnetic environment . . . . .	13
<b>E. L. Aero, A. N. Bulygin</b> , Yu. V. Pavlov	
New approach to solution of generalized (3+1) sine-Gordon equation . . . . .	14
<b>D. V. Alexandrov</b> , M. Yu. Lazarkov, B. M. Kashtan, A. V. Derov, G. A. Maximov	
Verification of the boundary condition on the hydrofracture edge at slow mode generation by external seismic field . . . . .	15
<b>I. V. Andronov</b>	
Diffraction by strongly elongated spheroid . . . . .	15
<b>Y. A. Antipov</b> , V. V. Silvestrov	
Diffraction by a right-angled electrically-resistive wedge . . . . .	16
<b>V. M. Babich</b>	
On a new class topographic waveguides . . . . .	16
<b>Andrey Badanin</b> , E. Korotyaev, M. Klein	
Spectral problems associated with periodic Boussinesq's equation . . . . .	17
<b>K. N. Bayramkulov</b>	
The modeling of fragment of area with magnetic field by Kirchhoff electric circuit network	17
<b>M. I. Belishev</b> , A. L Pestov	
Forward problem for two-velocity dynamical system (Timoshenko beam) . . . . .	18
<b>V. V. Belov, E. I. Smirnova</b> , A. Yu. Trifonov	
Semiclassical 2-component soliton-type solutions of the Gross–Pitaevskii equation . . .	19
<b>Amira Bensouissi, Michel Rouleux</b>	
Andreev reflection and the semiclassical Bogoliubov-de Gennes hamiltonian . . . . .	19
<b>Atul Bhaskar</b>	
Wave speed-porosity scaling in cellular solids . . . . .	19
<b>M. Sh. Birman, V. A. Sloushch</b>	
Two-sides estimates for trace of pair semi-groups difference . . . . .	20
<b>Ya. L. Bogomolov</b> , E. S. Semenov, A. D. Yunakovskiy	
On stability of a standing wave arising in the paraxial region of a quasi-optical electron accelerator . . . . .	20
<b>Ya. L. Bogomolov, R. V. Kashitsin</b> , A. D. Yunakovskiy	
Numerical methods for 2D nonlinear Schroedinger equation . . . . .	21
<b>Victor V. Borisov</b>	
Transient waves produced by Gaussian's transverse sources in a dispersive medium .	22
<b>Olga V. Borovkova</b> , Anatoly P. Sukhorukov	
Managed discrete diffraction on cascade-induced optical 2D arrays . . . . .	22
<b>V. V. Borzov</b> , E. V. Damaskinsky	
Dixatomic realization of harmonic oscillator via generalized Laguerre oscillator . . . .	24
<b>Vladimir I. Bronnikov</b> , Mikhail M. Kalugin	
Fluid flow velocity field measurement along probing radiation beam using frequency spectrum of dynamic speckle-pattern . . . . .	24
<b>Ya. A. Butko</b> , O. G. Smolyanov	
Feynman formulae for quantum evolution of quasiparticles with position-dependent mass	25

<b>Vitalii N. Chukov</b>		
On violation of Rayleigh law of scattering . . . . .		25
<b>Vitalii N. Chukov</b>		
Rayleigh wave scattering by deterministic cylindrical roughness with spatial statistical symmetry of an arbitrary order . . . . .		27
<b>D. B. Davletov</b>		
Asymptotics of eigenvalues of the Dirichlet boundary value problem for the Lame operator in a three-dimensional domain with a small cavity . . . . .		28
<b>M. N. Demchenko</b>		
On a partially isometric transform of divergence free vector fields . . . . .		28
<b>A. G. Demidov, E. Yarevsky</b>		
Adaptive finite element method based on superconvergence . . . . .		29
<b>S. Yu. Dobrokhotov</b>		
Explicit description near focal points of asymptotic solutions to the Cauchy problem for the linearized shallow water equations with initial localized perturbations . . . . .		30
<b>S. F. Dolbeeva, E. A. Rozhdestvenskaya</b>		
On the asymptotics of the solutions for the second order difference equation with a small parameter . . . . .		30
<b>F. D. Edemskii, A. V. Popov, S. A. Zapunidi, B. R. Pavlovskii</b>		
A model inverse problem of subsurface sensing . . . . .		31
<b>P. A. Eminov, S. V. Nikolaev</b>		
Adiabatic approximation in formalism of functional integral . . . . .		33
<b>Anna I. Esina</b>		
The semiclassical spectral series of Schrödinger operator with the delta potential . . . . .		34
<b>Tatiana Filatova</b>		
The semiclassical spectral series of Schrödinger operator with the delta potential . . . . .		35
<b>George V. Filippenko</b>		
The energy analyses of the shell vibrations problem. Shell is partially submerged into the liquid . . . . .		36
<b>N. Filonov, I. Kachkovskiy</b>		
Absolute continuity of the spectrum of the Schrödinger operator in a multidimensional cylinder . . . . .		36
<b>M. A. Galin, A. N. Reznik</b>		
Diffraction problem of near-field microwave location of a spherical object . . . . .		37
<b>Omar El Gawhary, Sergio Severini</b>		
Degree of paraxiality and pseudo-nondiffracting beams . . . . .		38
<b>Georgi Nikolov Georgiev, Mariana Nikolova Georgieva-Grosse</b>		
The $Z(c, n)$ numbers and their application in the theory of waveguides . . . . .		39
<b>Leonid I. Goray, Gunther Schmidt</b>		
Integral-equation conical solver: some formulas and numerical experiments . . . . .		40
<b>V. F. Guilimshina</b>		
On decay of solution of non-uniformly elliptic equation . . . . .		41
<b>A. Haki, M. Doosti, A. Ghorbani, Ayat Ghorbani</b>		
Vegetation clutter modeling in mono-static wideband radars . . . . .		42
<b>A. M. Il'in</b>		
Conditions of solvability of the boundary problem for the second order differential equation		42

<b>Vladimir Il'in</b> , Nikolai Zavyalov, Victor Farafonov, Alexander Vinokurov New approach to light scattering problem solutions using field expansions in terms of wave functions . . . . .	42
<b>M. V. Ivakhnychenko, E. I. Veliev, T. M. Ahmedov</b> Boundary conditions with fractional derivates in diffraction problems . . . . .	43
<b>Wonju Jeon</b> Edge diffraction and generalized gamma function . . . . .	44
<b>Stephan V. Joubert</b> , Michael Y. Shatalov, Charlotta E. Coetzee The influence of damping and internal prestress on Bryan's effect in vibrating and rotating bodies . . . . .	45
<b>A. Katchalov</b> Geometric ideas and Gaussian beams . . . . .	45
<b>Tatiana I. Khabakhpasheva</b> , Aleksander A. Korobkin Effect of aeration on fluid-structure interaction . . . . .	46
<b>S. Khekalo</b> Analog of the Darboux transformation for the ordinary differential operators of high orders . . . . .	47
<b>Aleksei P. Kiselev</b> , Graham A. Rogerson Laterally dependent surface and interfacial waves in a layered elastic structure with a general depth dependence . . . . .	48
<b>T. V. Kochubey T.V.</b> The method of eddy currents computation on median surface of multiconnected plate with anisotropic heterogeneous conductivity . . . . .	49
<b>A. A. Korshunova, O. S. Rozanova</b> The Riemann problem for the stochastically perturbed inviscid Burgers equation . . . . .	50
<b>D. P. Kouzov, J. A. Solovyeva</b> Diffraction on a hard half-infinite screen of non-stationary wave with linearly changing along the front amplitude . . . . .	51
<b>M. D. Kovalev</b> The number of optical TE-modes in a planar waveguide . . . . .	51
<b>V. Kozlov, N. Kuznetsov</b> On the Benjamin–Lighthill conjecture for steady water waves . . . . .	52
<b>A. P. Krauklis</b> , P. V. Krauklis, V. L. Ustinov Hazard precursor while drilling . . . . .	53
Victor F. Kravchenko, Dmitry V. Churikov Digital signal and image processing on basis of orthogonal Kravchenko wavelets $\{\widetilde{h_a(t)}\}$	53
Victor F. Kravchenko, Dmitry V. Churikov New constructions of Kravchenko-Kotel'nikov-Chebyshev-Legendre spectral kernels in time-and-frequency distributions . . . . .	54
Victor F. Kravchenko, Oleg V. Kravchenko, Ansar R. Safin Kravchenko-Rvachev atomic distributions in diffraction theory . . . . .	55
Victor F. Kravchenko, Aleksey V. Yurin Galerkin-Petrov variational principles based on Rvachev functions and wavelets in the boundary value problems of electrodynamics . . . . .	56
<b>P. A. Krutitskii</b> Properties of a solution to the Dirichlet problem for the Helmholtz equation in a planar domain with cracks . . . . .	57

<b>Aleksey Kudreyko</b>	
Wavelet approach towards solution of the Fredholm type integral equations . . . . .	58
<b>A. V. Kudrin</b> , E. Yu. Petrov, T. M. Zaboronkova	
Electrodynamic characteristics of strip antennas in resonant anisotropic media . . . . .	58
<b>M. P. Kutovenko</b>	
Finite-difference modelling of Gaussian beam propagation in complex geological media	59
<b>Alexander G. Kyurkchan</b> , Nadezhda I. Smirnova	
Wave scattering by bodies with inhomogeneous absorbing coating . . . . .	60
<b>Vladimir Lotoreichik</b> , Jussi Behrndt, Igor Lobanov, Igor Yu. Popov	
Essential spectrum of a leaky wire in $\mathbb{R}^2$ . . . . .	61
<b>Mats D. Lyberg</b>	
Integration of the flow equations for internal flows . . . . .	62
R. Mahillo-Isla, <b>M.J. González-Morales</b> , C. Dehesa-Martínez, R. de la Rosa-Steinz	
Scattering by a perfect conductor half-plane under 2D complex beams incidence: progress on the geometrical and diffraction contributions . . . . .	62
<b>P. G. Malischewsky</b>	
Connections between seismology, wave-guide physics and quantum mechanics . . . . .	63
<b>S. A. Manenkov</b>	
Diffraction of eigenmode of circular waveguide on the obstacle inside the waveguide . .	64
<b>German A. Maximov</b>	
Account of resonance relaxation in the framework of double phase continuum mechanics for sound description in a liquid with air bubbles . . . . .	65
<b>Viatcheslav V. Meleshko</b> , Anastasiya A. Bondarenko	
Response of a rectangular elastic waveguide to a cyclic loading force . . . . .	66
G. P. Miroshnichenko, I. Yu. Popov, <b>A. I. Trifanov</b>	
Three qubit operation in the five level optical medium . . . . .	67
<b>L. A. Molotkov</b> , A. A. Mukhin	
Dispersion curves of normal waves in a porous layer surrounded by elastic half-spaces .	68
<b>Oleg V. Mitygin</b>	
On unique solvability for problems of surface-wave theory describing wave–body interaction . . . . .	68
<b>Vladimir E. Nazaikinskii</b>	
Asymptotic estimates for the number of states in a system of particles . . . . .	69
<b>Serguei A. Nazarov</b>	
An elementary approach to detect trapped surface waves . . . . .	70
<b>Serguei A. Nazarov</b>	
Water-waves in canals: exotics in the spectra . . . . .	70
<b>R. V. Nekrasov</b>	
Tunneling between two close quantum wires in a magnetic field . . . . .	71
<b>A. V. Osetrov</b> , E. Chilla, B. Steiner, R. Grünwald, A. Jaffer, A. G. Hodkin	
Diffraction of surface acoustic waves within interdigital transducers . . . . .	71
<b>O. I. Paseka</b> , V. E. Lobanov, A. P. Sukhorukov	
Compression of quadratically phase-modulated few-cycle pulses in dispersive medium .	73
<b>A. B. Plachenov</b> , V. N. Kudashov, A. M. Radin	
Modes of two-mirror cavity with non-coinciding main curvature directions . . . . .	74

<b>I. Yu. Popov, E. S. Trifanova</b>		
Asymptotics of resonances for curved coupled waveguides . . . . .		75
<b>M. M. Popov, V. V. Zalipaev</b>		
Gaussian beams summation in quantum problems of electronic motion in magnetic field . . . . .		75
<b>Teresa Regińska</b>		
Application of wavelets to regularization of Cauchy problems for the Helmholtz equation . . . . .		76
<b>Keijo Ruotsalainen</b>		
Adaptive wavelet method for time-fractional diffusion . . . . .		77
<b>Sergey Sadov</b>		
Eigenvalue distribution of matrices approximating integral transformations . . . . .		78
<b>B. A. Samokish, A. O. Rodnikov</b>		
Difference method for solving diffraction problem in the half plane with a cut . . . . .		78
<b>A. M. Samsonov, G. V. Dreiden, I. V. Semenova, K. R. Khusnutdinova</b>		
On fission of strain solitons in delaminated bars . . . . .		78
<b>S. Ya. Sekerzh-Zenkovich, B. I. Volkov</b>		
Modeling of unusual tsunami directivity with elementary functions . . . . .		80
<b>A. S. Serdyukov</b>		
Optimal parameterization in the inverse kinematics problem in anisotropic media . . . . .		80
<b>Andrei I. Shafarevich</b>		
Semiclassical asymptotics for Schrödinger equations on graphs and decorated graphs . . . . .		81
<b>A. V. Shanin</b>		
High frequency modes in 2D rectangular "room" with windows . . . . .		82
<b>K. S. Shaposhnikov</b>		
On eigenfunctions of integral operator with weakly singular kernel . . . . .		82
<b>V. M. Shelkovich</b>		
Delta-shocks and transport of mass, momentum and energy in multidimensional zero-pressure gas dynamics . . . . .		83
<b>Ilya A. Shereshevskii, Igor M. Nefedov</b>		
Fast Fourier algorithm for solving difference Helmholtz equation on rectangular grid in complicated regions . . . . .		84
Vladlen Shvedov, <b>Yana Izdebskaya</b> , Andrei Rode, Anton Desyatnikov, Wieslaw Z. Krolkowski, Yuri Kivshar		
Generation of optical bottle beams . . . . .		84
<b>M. Skopina</b>		
<i>p</i> -Adic pseudo-differential equations and wavelets . . . . .		85
Alexander I. Slepkov, <b>Olga V. Gallyamova</b>		
On features of Smith-Purcell radiation resonant regimes in relativistic diffractive generator . . . . .		86
Alexandr S. Slusarenko, <b>Galina N. Dyakova</b>		
Metrological aspects of hardware-software complexes of recognition of signals in radio-navigating systems . . . . .		87
<b>V. I. Storozev, R. P. Moiseyenko</b>		
Antiplane wave scattering on tunnel cylindrical void with hard inclusions of radial cross-section in straight-line orthotropic body . . . . .		87
<b>Azat M. Tagirdzhanov, Alexander S. Blagovestchenskii, Aleksei P. Kiselev</b>		
"Complex source" in real space . . . . .		88

<b>Anton A. Tolchennikov</b>	
Kernel and trace formula for the exponential of the Laplace-Beltrami operator on a decorated graph . . . . .	88
<b>A. Torre</b>	
Separable solutions of the wave equation from a general type of solutions of the paraxial equation . . . . .	89
<b>Andrei B. Utkin</b>	
Undistorted progressive waves resulting from separation of variables in some orthogonal curvilinear coordinate systems . . . . .	90
<b>Nadezhda K. Vdovicheva</b> , Alexander N. Reznik, Ilya A. Shereshevskii	
On inverse problem of near-field microscopy of layered media . . . . .	91
<b>F. F. Valiev</b>	
Application of the retarded potential for the description of electromagnetic field produced by current's pulse, running along the line segment . . . . .	91
<b>Valery Yu. Valyaev</b> , Andrey V. Shanin	
Spectral equation for a strip/slitz diffraction problem: numerical algorithm . . . . .	92
<b>Nikolai Veniaminov</b>	
Remainder estimate for the Weyl spectral asymptotics of the Maxwell operator in Lipschitz domains . . . . .	92
<b>Z. A. Yanson</b>	
The asymptotics of whispering gallery waves for crystal groups with even order axes of symmetry . . . . .	93
<b>N. F. Yashina, T. M. Zaboronkova</b>	
Nonlinear interaction of the electromagnetic waves guided by anisotropic plasma cylinder	94
<b>Vasyl V. Yatsyk</b>	
The generation of harmonics on multiple frequencies at the problem of diffraction of electromagnetic wave on nonlinear dielectric layered structure . . . . .	95
<b>V. V. Zalipaev</b> , F. V. Kusmartsev	
Localized states of electrons and holes in a finite crystal resonator in electrostatic and magnetic fields . . . . .	96
<b>G. L. Zavorokhin</b>	
On the Rayleigh wave propagation along the boundary of an inhomogeneous anisotropic porous Biot medium . . . . .	97
<b>Mahshid Zoyousefin</b> , Ayaz Ghorbani	
A propagation model for designing an emission-security standard . . . . .	98
<b>SPECIAL SECTION: METAMATERIALS</b>	100
<b>Andrea Alù</b> , Nader Engheta	
Guided modes and power relationships for linear arrays of plasmonic nanoparticles . .	100
<b>Andrea Alù</b> , Nader Engheta	
Resonances and bandwidth issues in finite arrays of coupled plasmonic nanoantennas .	101
<b>Andrea Alù</b>	
Plasmonic and metamaterial cloaking: fundamental principles, salient features and future trends . . . . .	101
<b>F. Aznar, A. Vélez, M. Gil</b> , M. Durán-Sindreu, J. Bonache, F. Martin	
Recent progress on modelling and conceptions of resonant type metamaterial transmission lines . . . . .	103

<b>A. P. Balmakov, I. V. Semchenko</b>	Absorption selectivity of electromagnetic waves of visible and ultraviolet range by a thin film of DNA . . . . .	105
<b>V. G. Baryshevsky, Y. A. Hurnevich</b>	Long-wave approximation in the theory of dynamic diffraction of waves in photonic crystals formed by metallic threads . . . . .	106
<b>P. A. Belov, G. Palikaras, Y. Zhao, C. Simovski</b>	Hyperlens formed by array of metallic rods . . . . .	107
<b>A. V. Dorofeenko, A. P. Vinogradov, A. M. Merzlikin, A. A. Lisyansky, A. B. Granovsky, Yu. E. Lozovik</b>	Control of the energy distribution in 1D photonic crystals . . . . .	108
<b>M. Durán-Sindreu, F. Aznar, A. Vélez, J. Bonache, F. Martin</b>	Artificial transmission lines exhibiting left handed and right handed wave propagation and implemented by means of open split ring resonators (OSRRs) and open complementary split ring resonators (OCSRRs) . . . . .	109
<b>V. G. Fedotov, A. V. Sel'kin</b>	On modeling of multiple Bragg diffraction of light in opal-like photonic crystals . . . . .	110
<b>D. Felbacq, B. Guizal, G. Bouchitté, C. Bourel</b>	Wave transport in metamaterials and photonic crystals . . . . .	112
<b>D. Felbacq, G. Bouchitté, C. Bourel</b>	Homogeneous properties of dielectric metamaterials . . . . .	113
<b>Ildar Gabitov, Bridget Kennedy, Andrei Maimistov</b>	Coherent amplification of optical pulses in doubly-resonant optical metamaterials . . . . .	113
<b>S. N. Galyamin, T. Yu. Alekhina, A. V. Tyukhtin, E. G. Doil'nitsina</b>	Radiation of a charge passing from vacuum into the left-handed medium . . . . .	115
<b>M. V. Golovkina</b>	The electromagnetic wave amplification in two-layered waveguide with superconducting film . . . . .	116
<b>V. Khardikov, K. Yarko, S. Prosvirnin</b>	Trapped-mode resonances in optic planar structures with complex metal elements . . . . .	117
<b>M. Khodzitsky</b>	Stop bands in magneto-photonic crystal and surface states in the photonic crystal/magnetic layer in the millimeter waveband . . . . .	118
<b>M. Khodzitsky, A. Shirinya</b>	“Tamm states” and left-handed transmission in the structure of photonic crystal/array of magnetic microwires in the millimeter waveband . . . . .	119
Irina Khromova, <b>Karu Esselle</b> , Ramón Gonzalo, Iñigo Ederra	Frequency selective transmission in EBG structures . . . . .	120
<b>Olga V. Kostylyova, Alexey A. Girich, Mikhail K. Khodzitsky, Oksana V. Shramkova, Alexey A. Bulgakov, Sergey I. Tarapov</b>	Transmission spectrum peculiarities of the magneto-photonic crystal bounded with the semiconductor layer . . . . .	122
<b>Denis Lafarge</b>	Homogenization of acoustic metamaterials made of compressible fluid and rigid solid .	123
<b>M. F. Limonov</b>	Opal-based photonic crystals . . . . .	124

<b>V. F. Marchenko, A. P. Sukhorukov, I. G. Zakharova</b>	
Spatial structure of modulated light beams under Bragg diffraction in photonic crystals	125
<b>Stanislav I. Maslovski</b>	
Subwavelength imaging without negative index metamaterials . . . . .	126
<b>A. M. Merzlikin, A. P. Vinogradov, A. V. Dorofeenko, T. Goto, A. V. Baryshev, M. Inoue, A. A. Lisyansky, A. B. Granovsky, S. I. Tarapov, M. K. Khodzitsky, S. V. Chernovtsev, D. P. Belozorov</b>	
Tamm states in photonic crystals . . . . .	128
<b>A. A. Orlov, A. V. Chebykin, P. A. Belov</b>	
Strong spatial dispersion effects in multilayered metal-dielectric nanostructures . . . .	128
<b>George K. Palikaras, Clive G. Parini, Yang Hao</b>	
Low-profile high-directivity reconfigurable metamaterial hybrid antennas . . . . .	129
<b>Alain Priou, Habiba Ouslimani</b>	
From conducting or dielectric loaded composite materials to electronic aggregate composite materials and metamaterial structures and theirs applications . . . . .	131
<b>Alain Priou, Habiba Ouslimani</b>	
L and millimeter bands metamaterial antennas . . . . .	131
<b>M. V. Rybin</b>	
Fano resonance involving Bragg - scattering in photonic crystals with inherent disorder	132
<b>A. K. Samusev, A. V. Baryshev, V. A. Kosobukin, M. F. Limonov, A. V. Moroz, M. V. Rybin, K. B. Samusev</b>	
Three-dimensional Bragg diffraction from opal-based photonic crystals . . . . .	133
<b>D. O. Saparina, A. P. Sukhorukov</b>	
Nonlinear optical interactions of surface and bulk waves on metamaterial-dielectric interface . . . . .	134
<b>A. K. Sarychev</b>	
Optics of active metamaterials . . . . .	136
<b>A. Sihvola, I. V. Lindell</b>	
The DB boundary condition and applications in electromagnetics . . . . .	136
<b>Constantin Simovski</b>	
Subwavelength imaging based on metasurfaces . . . . .	137
<b>Constantin Simovski</b>	
Locality of material parameters for Drude transition layers at metamaterial surfaces .	138
<b>E. Chernjakov, M. Kukhtin, A. Nerukh, M. Khodzitsky, S. Tarapov, L. Lisetski, A. Cocherzin</b>	
Magnetic features of nematic liquid crystals in the millimeter waveband . . . . .	139
<b>P. Tassin, N. Dalarsson, M. Dalarsson, Z. Jaksic</b>	
General analytical treatment of the graded interfaces with negative-index nanocomposites	140
<b>Prabhat Verma, Atsushi Ono, Satoshi Kawata</b>	
Plasmonic nanolens for subwavelength color imaging . . . . .	141
<b>V. G. Veselago</b>	
The transport of energy, linear momentum and mass by radiation in negative refraction materials . . . . .	142
<b>Anna Vozianova, Alexander Nerukh</b>	
Surface plasmon polaritons in non-stationary problems . . . . .	143
<b>J. R. Willis</b>	
Effective constitutive relations for waves in composites and metamaterials . . . . .	144
