Proceedings of the International Conference “Days on Diffraction 2020”, St. Petersburg, Russia

Edited by O.V. Motygin (Institute for Problems in Mechanical Engineering, St. Petersburg)
A.P. Kiselev (St. Petersburg Department of V.A. Steklov Mathematical Institute)
L.I. Goray (St. Petersburg Academic University & Institute for Analytical Instrumentation)
T.M. Zaboronkova (University of Nizhny Novgorod)
A.Ya. Kazakov (St. Petersburg University of Aerospace Instrumentation)
A.S. Kirpichnikova (University of Stirling, Scotland UK)

“Days on Diffraction” is an annual conference taking place in May–June in St. Petersburg since 1968. The present event is organized by St. Petersburg Department of the Steklov Mathematical Institute, St. Petersburg State University, and the Euler International Mathematical Institute.

The conference is supported by a grant from the Government of the Russian Federation, agreement № 075-15-2019-1620, and by Simons Foundation (via PDMI RAS, grant № 507309).

The Organizing Committee thanks all scientists from different parts of the world who participated in the on-line conference “Days on Diffraction 2020”. Of special gratitude are the authors of extended abstracts submitted to the Proceedings; 22 of the papers (selected by peer-review) are published in the present issue.

Web site of the conference: http://www.pdmi.ras.ru/~dd/

The conference is organized and sponsored by

St. Petersburg Department of V.A. Steklov Institute of Mathematics
St. Petersburg State University
The Euler International Mathematical Institute

## Contents

C.N. Alexeyev, E.V. Barshak, D.V. Vikulin, B.P. Lapin, M.A. Yavorsky  
Toffoli gate in twisted anisotropic and multihelical optical fibers ........................................... 7

Bryantsev B.S., Kalinovich A.A., Zakharova I.G., Komissarova M.V., Sazonov S.V.  
Two-component optical vortices at zero group velocity dispersion ............................................. 13

M.N. Demchenko  
Determination of a wave field in a layered medium from boundary data ........................................... 19

Victoria M. Filatova, Valeria A. Sedaikina  
Visualization of complex shape inclusions in the breast ultrasound tomography problem, image processing ................................................................. 25

Leonid I. Goray, Alexander S. Dashkov  
GPU-based optimizations of the boundary integral equation method to solve direct and inverse diffraction grating problems ......................................................... 31

Alexey V. Ivanov  
Exponential dichotomy of linear cocycles over irrational rotations ................................................. 38

Andrey Kovtanyuk, Alexander Chebotarev, Varvara Turova, Irina Sidorenko, Renée Lampe  
Inverse problem for a linearized model of oxygen transport in brain ............................................ 44

Sergey B. Kuzitskiy  
On the mode parabolic equation method for the elastic media ....................................................... 50

A.V. Kudrin, A.V. Ivoninsky, O.M. Ostafiychuk, T.M. Zaboronkova  
Resonance scattering of the dipole radiation by a cylindrical density duct in a magnetoplasma ... 56

Christina Kuttler, Anna G. Maslovskaya  
Wave effects in stochastic time lagging reaction-diffusion model of quorum-sensing in bacterial populations ................................................................. 62

Venedikt M. Kuz’kin, Gennadiy N. Kuznetsov, Sergey A. Pereselkov, Michael V. Kutsov, Dmitrii Yu. Prosovetetskii  
Interferometric localization of a moving noise source by using of high-frequency signals ...................... 68

Valeria Yu. Martynova, Marina A. Moskaleva, Daria V. Raschetova  
Symmetric guided waves in an isotropic inhomogeneous shielded waveguide .................................... 74

Olga A. Miakisheva, Evgeniy V. Glushkov, Natalya V. Glushkova  
Air-coupled ultrasonic inspection of anisotropic composite plates .................................................. 79

Alexander S. Mikhaylov, Victor S. Mikhaylov  
Solution of Toda lattices for semi-bounded initial data ....................................................................... 85

Oleg V. Motygin  
On regularization of the Heun functions ............................................................................................ 89

Sergey A. Pereselkov, Pavel V. Rybyanets, Elena S. Kaznacheeva, Mohsen Badiey, Venedikt M. Kuz’kin  
Broadband sound scattering by intense internal waves ....................................................................... 95

Mikhail M. Popov  
On matching of asymptotic representation of a whispering gallery wave propagating along a smooth surface in $\mathbb{R}^3$ and the wavefield of a source ............................................................................. 100
Alisa N. Shpak, Mikhail V. Golub, Sofja A. Glinkova, Artur D. Khanazaryan
3D mathematical model for the simulation of piezo-induced guided waves in an elongated plate-like structure ................................................................. 104

Tikhov S.V., Valovik D.V.
Propagation of TM waves in a shielded dielectric waveguide filled with nonlinear anisotropic medium .................................................................................. 110

Tatyana M. Zaboronkova, Natalia F. Yashina, Catherine Krafft
Propagation of VLF waves guided by plane density trough in the magnetosphere .................. 116

Zalipaev V., Vialov V., Matveentsev A.
Surface waves generation in Sommerfeld antenna radiolocation problem .......................... 121

Ekaterina A. Zlobina
Diffraction by a jump of curvature: wavefield near the limit ray at a moderate distance .... 128

Author index .................................................................................................................. 131
