

**A COMBINATORIAL CONJECTURE RELATED WITH
COMPLEX BOUNDED SYMMETRIC DOMAINS - ERRATUM**

GUY ROOS

Erratum

For type III_n , the correct value for the critical exponent is

$$\mu_0 = \frac{g}{d+1} = \frac{n+1}{\frac{n(n+1)}{2} + 1} = \frac{2}{n + \frac{2}{n+1}},$$

instead of $\frac{2}{n + \frac{1}{n+1}}$.
